## **ONE PLANET AFTERSCHOOL INTERN DETAILS**

With the support of Vermont Afterschool Inc. and the McClure Foundation, One Planet will be offering high school students the opportunity to take on leadership positions within our program, gain work experience and earn money!

The Program:

- 1) August and early September: One Planet will be accepting Internship applications from 8-12<sup>th</sup> grade students.
- 2) In Mid-September: Vermont Afterschool Inc. will come and train our Interns to teach an Engineering unit to our K-6<sup>th</sup> grade students in the One Planet Afterschool Programs. This training is REQUIRED. It will take place in South Royalton, date and time to be decided. Interns will be given a curriculum with all the materials, lesson plans and support they need to implement this curriculum successfully.
- 3) In September, interns will be partnered with another intern. A weekly schedule will be designed based on the interns' availability. Interns will need to be available at least 1 day afterschool a week throughout the fall and winter.
- 4) In October, partner interns will be placed in One Planet programs. Interns can choose which elementary site they prefer (Bethel, Chelsea, Newton, Rochester, Sharon, South Royalton, Stockbridge, Tunbridge). Partner interns will work together one day a week (more is an option too) with our One Planet participants.
- 5) Throughout the fall, interns will receive additional training in effectively teaching Engineering and will also be trained to evaluate their own performance and make improvements.
- 6) Late fall & winter, Vermont Afterschool Inc. will train interns to teach a 2<sup>nd</sup> Engineering unit.
- 7) In January-March, interns will teach 2<sup>nd</sup> Engineering unit in afterschool programs.

### **Interns NEED TO:**

- Be in 8<sup>th</sup>, 9<sup>th</sup>, 10<sup>th</sup>, 11<sup>th</sup> or 12<sup>th</sup> Grade
- Be interested in gaining leadership experience
- Be ready to learn new things
- Enjoy working with kids
- Be available after school one day a week (roughly 3:30-5:30pm)
- Commit to this internship from mid-September to March

**Interns DO NOT NEED:**

- Special science or engineering skills or background
- Formal work experience

**Important Details**

- Interns will need to complete hiring and payroll paperwork for the Supervisory Union
- Interns will be paid a stipend based on their age and experience (range is \$8-\$10/hr). They will receive the first half of their stipend upon completing the 1<sup>st</sup> Engineering Unit. This will cover hours worked from mid-September through November. Interns will receive the second half of their stipend upon completing the 2<sup>nd</sup> Engineering Unit. This will cover hours worked from beginning of December through February.
- Interns will be expected to teach at least 6 days out of 11 during Session I (using Unit 1 curriculum) and 6 days out of Session II (using Unit 2 curriculum)
